

AI SOFTWARE DEVELOPMENT

Zaryah Technologies

*We build the AI software
that builds your business.*

Custom software · Agentic AI · AI agents · Embedded teams

PITCH DECK · 2026

INDIA · UAE · GLOBAL
DELIVERY

Every business is becoming *an AI business.*

The question isn't whether to build with AI — it's who you trust to build it. The shops that move fastest, ship cleanest, and scale beyond the demo are the ones writing the next decade.

78%

of enterprises now run AI in production

10x

faster shipping with agentic workflows

\$4.4T

annual value AI is forecast to unlock

"The next billion-dollar businesses will be designed by humans and built with AI."

An AI software studio, *engineered for the second wave.*

Five years deep in production AI. IIT-incubated. 35 engineers who care more about the work than the title. We ship enterprise-grade systems — and we ship them in weeks, not quarters.

5+

Years in production AI

35+

Specialist engineers

30K+

Active users on shipped

8X

Cost-efficient vs Western shops

IIT-INCUBATED · FORBES TECH COUNCIL · SOC 2 / ISO 27001 · MENA · APAC · NA

Four ways we plug in.

Pick one. Mix and match. Start with a POC and scale to a full team — your call.

Custom AI Software

Built from spec

Web, mobile, backend, ML pipelines. End-to-end product engineering with AI woven in.

01

Agentic AI Development

Systems that act

Autonomous multi-step AI workflows that plan, decide, and execute — humans in the loop where it matters.

02

AI Agent Creation

Purpose-built specialists

Support, research, coding, ops. Drop-in AI agents that own a workflow inside your stack.

03

Resource Placement

Embedded talent

Senior AI engineers, ML scientists, full-stack devs — placed on your team. Vetted, ramped, billed monthly.

04

Custom AI Software Development

Spec to ship. Web, mobile, backend, ML pipelines — all of it.

WHAT YOU GET

- ✓ Full-stack web & mobile apps (React, Next.js, Flutter)
- ✓ Backend, APIs, microservices on AWS / Azure / GCP
- ✓ ML pipelines, data infra, model training & deployment
- ✓ Production-grade DevOps, observability, SOC 2 baseline

STACK

Modern rails

PyTorch · TensorFlow

LangChain · MLflow

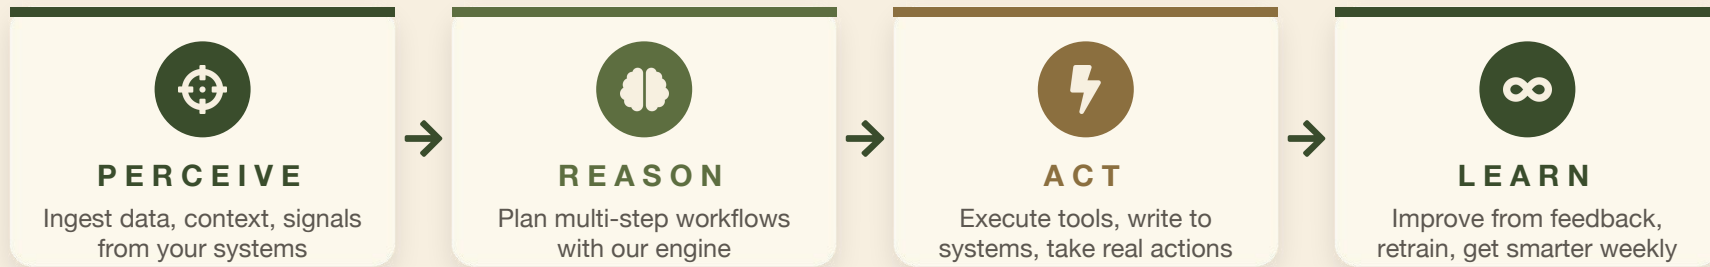

Kubernetes · Docker

React · Next.js

FastAPI · gRPC

Agentic AI Development

Systems that don't just answer — they act. Plan, decide, execute, adapt.

EXAMPLES IN THE WILD

Marketing campaigns that self-optimize

Supply chains that re-route in real time

Sales pipelines that prioritize themselves

AI Agent Creation

Specialist AI workers that live inside your stack and own a workflow end-to-end.

Support

Customer success

- Handles 80% of tier-1 tickets
- Reads order history
- Issues refunds via your API

Research

Knowledge work

- Pulls from 50+ sources
- Synthesizes briefs
- Cites everything

Ops

Internal workflows

- Writes & tests code
- Triage alerts
- Updates Jira & Slack

Each agent integrates with your existing tools — Salesforce, Slack, Jira, HubSpot, custom APIs.

Contractual Resource Placement

Senior engineers embedded on your team. Monthly billing. Zero overhead.

ROLES WE PLACE

- AI / ML Engineers (LLMs, RAG, fine-tuning)
- Full-Stack Developers (React, Node, Python)
- Data Engineers (pipelines, warehousing)
- DevOps & Platform Engineers (AWS, K8s)
- Blockchain Engineers (Solidity, Web3)
- Product Designers & QA Specialists

THE MODEL

Engagement	3-month minimum
Billing	Monthly · USD or AED
Vetting	Top 5% of our bench
Ramp time	5 business days
Replacement	Within 7 days

Hire fast. Pause anytime. Convert to full-time when you're ready.

From kickoff to production in weeks, not quarters.

An agile, lean delivery loop. We ship something real every two weeks and iterate with you in the room.

Daily syncs in your timezone

Code in your repo from day one

No lock-in — your IP

World-class output, *at a third of the bill.*

Same caliber engineers. Same compliance posture. Different cost structure — and we pass it through to you.

WHAT YOU'RE COMPARING	TYPICAL US / EU SHOP	ZARYAH
Senior AI Engineer (monthly)	\$22,000 – 32,000	\$3,500 – 5,500
POC delivery	8 – 14 weeks	2 – 4 weeks
Minimum engagement	6+ months	Project or month-to-month
Proprietary AI frameworks	Rare	4 in production
Compliance baseline	Varies	SOC 2 · ISO 27001 · GDPR

"Save the runway. Spend it on something that matters — like winning the market."

Shipped to production. *At scale.*

INSTITUTIONAL ACCESS

Direct relationships across India's education ecosystem, government bodies, and Tier-1 institutions — translating into faster procurement and warmer doors.

Three doors. Walk through any of them.

TRY US

Discovery

FREE

first sprint

Two weeks. We scope, prototype, and show you something working. Walk away with the code if we're not a fit.

Best for: testing the partnership

MOST CHOSEN

Project Build

FIXED

per milestone

Defined scope, fixed price, fixed timeline. We deliver, you ship. Production-ready handoff in 6–12 weeks.

Best for: known specs, deadline pressure

SCALE WITH US

Embedded

MO/MO

per engineer

1 to 20 engineers placed on your roster. Pause, scale, or convert anytime. They feel like your own team.

Best for: long-haul, evolving roadmaps

All three include: dedicated PM · daily syncs · weekly demos · your repo · your IP.

LET'S BUILD

The first conversation is *on the house.*

Bring us a problem, a sketch, or a vague hunch. We'll come back in 48 hours with a plan, a price, and a path to production.

- ✓ Free 60-min architecture review
- ✓ Custom POC scope within 5 days
- ✓ Fixed quote — no hourly games
